

Bit-Services: Ethernet Transport

Data connections for high bandwidths

DataHub connects your sites throughout Switzerland using optical leased lines. The optimal solution for transporting heavy and complex Gigabit data traffic. The Ethernet Transport Service provides you with guaranteed bandwidths, high availability and 24/7 pro-active monitoring via the DataHub Service Center. The ideal solution when it comes down to speed and availability.

Standard features

Bandwidths	Optical interfaces	Electrical interfaces
1 Gbps	MMF 850nm; SMF 1310nm	1000BaseT, RJ45
10 Gbps	SMF 1310nm	
40 Gbps	SMF 1310nm	
100 Gbps	SMF 1310nm	
400 Gbps	SMF 1310nm	

Service features

Basic service level

Availability	99.90 %, 8h maximum downtime per year
Monitoring	Service is monitored reactively (customer opens a ticket)
Support level	24/7
Help desk	24/7

Premium service level

Availability	99.95 %, 4h maximum downtime per year
Monitoring	Service is monitored proactively
Support level	24/7
Help desk	24/7
